Woodburning Stoves

FireFX

Comfort That Lingers

Thoughtful design, reliable performance and the natural beauty of flame come together in the FireFX collection of woodburning stoves. Designed to bring a sense of comfort and character into your home, each FireFX stove is designed with versatility in mind, complementing a wide variety of interiors.

Across the range, every model combines high performance and quality craftsmanship, transforming your living space into a relaxing haven with warmth that lingers long after the fire has faded.

firefxfires.com

Advanced Ecodesign Performance

All FireFX woodburning stoves comply with the latest Ecodesign standards for low permitted emissions and high efficiency – setting the benchmark for cleaner, responsible home heating. Burning sustainably sourced wood offers a renewable way to warm your home, and seasoned or kiln-dried logs ensure optimum performance and a cleaner, efficient burn.

Atlas 2

Urban Area Approved

In the UK, most town and city homes are located in Smoke Control Areas. Here, you need to use a DEFRA-exempt stove to be able to burn wood. All stoves in this brochure are DEFRA-exempt, which means they have the seal of approval for burning logs in these zones.

Five Year Extended Warranty

When you purchase a FireFX stove from our Expert Retailer Network your retailer will provide you with a Two Year Warranty for your new solid fuel stove. This can then be extended to a Five Year Warranty provided your stove is registered with FireFX. Full warranty terms and conditions are available to view at firefxfires.com

Important Safety & Technical Information

A site survey by a qualified solid fuel installer is recommended before purchase, and all FireFX solid fuel stoves must be installed by an approved professional. Fires and stoves require adequate air supply; consult a competent person of solid fuel installations to advise if a fixed air vent is needed to meet Building Regulations. A Carbon Monoxide monitor is legally required. During use, all stove surfaces, particularly the glass panel in the door, become extremely hot and can cause serious injury if touched. Use a fireguard conforming to the latest version of BS 8423 when children, the elderly, or infirm are present.

Photography Information

FireFX pursue a policy of continuous product improvement, therefore, whilst our products are correct at the time of photography, we reserve the right to make alterations and amendments. Exact product details should be discussed with your retailer at the time of purchase.
